

# WHITE PAPER v1

Spotrex •

# OVERVIEW

Nowadays, vacations are no longer just an additional need but have become a crucial aspect of life. However, ironically, advancing technology tends to complicate things for travelers. Recommendations from websites or social media often lack objectivity, showcasing only positive reviews, influenced by advertising algorithms.

It is this background that propels us to embark on a project aimed at providing a solution and benefit for travelers worldwide, enabling them to experience the best of their vacations.

## **Welcome to the project Spotrex!**

We start this project with a determination to address the challenges faced by travelers in finding the best tourist destination recommendations. Introducing increasingly advanced technology, we are committed to providing objective and beneficial solutions.

***“Unlock the Best Adventures with the Best Recommendations”***

With our innovative spirit, we are committed to delivering a more satisfying and planned holiday experience for travelers worldwide.

# ABOUT SPOTREX

Spotrex is a project designed to provide the best recommendations to travelers about tourist destinations, both positive and negative, openly and in detail.

We strongly believe that honest reviews are crucial for travelers to have the best experience at the destinations they visit!

## Welcome to the project Spotrex!

To achieve this, a key question that needs to be answered is how to display credible and widely distributed comments or reviews worldwide.

**01** The first step, we will build a community as the foundation of the system. Travelers from around the world will be involved in providing credible reviews based on their experiences of the destinations they visit.

**02** To increase participation interest in our system, we will incentivize users by providing rewards for the reviews they provide.

**03** Integration with the crypto ecosystem is crucial due to its flexible access, allowing us to provide rewards to our review contributors.

**04** Finally, we will publicly list this project on the crypto ecosystem as a commitment from us. We also feel it's important to involve travelers in building this project.

# SPORTREX INTEGRATION

Here are the details about the Sportrex token (SPTX) and information about the distribution of Sportrex token supply.

We adopt this concept because it is highly relevant to the fundamental key points we have defined. For example

## Example 1 :

In building a community, an efficient strategy to strengthen the community network is by maintaining user interest in this project. We will utilize the Sportrex cryptocurrency token, distributed through contribution rewards or participation, to sustain user interest in the value of Sportrex tokens as an attractive investment asset.

## Example 2 :

The foundation of our system is to create the best recommendations, which can be achieved through active involvement of travelers in providing their recommendations. The Sportrex token plays a key role in this process, serving as an incentive for participation by providing rewards. This approach is efficient as it can reach users worldwide in providing rewards, overcoming the barriers of diverse currencies.

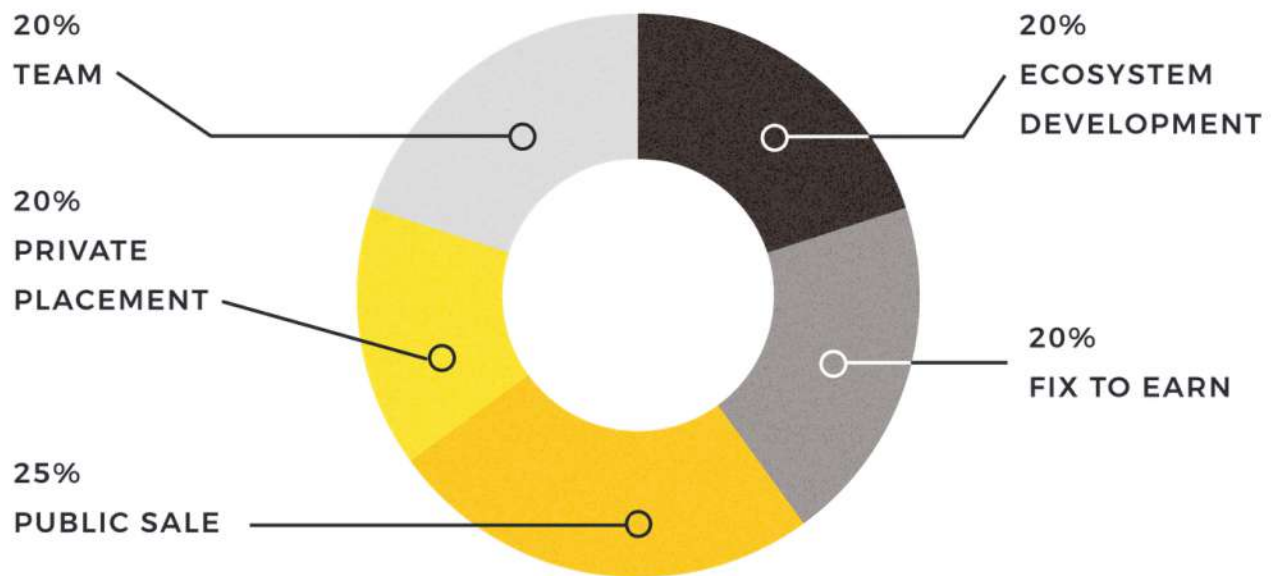

Therefore, we will develop the Sportrex project by creating our own cryptocurrency. Currently, this project will operate on the Binance Smart Chain (BEP-20) network, one of the largest networks in the crypto ecosystem.

# TOKENOMICS

Berikut adalah detail tentang token Sportrex (SPTX) dan informasi distribusi supply token Sportrex.

Token Name :	<b>Sportrex</b>
Ticker :	<b>SPTX</b>
Total Supply :	<b>5,000,000,000 SPTX</b>
Seed Sale :	<b>10,000 SPTX</b>
Private Sale 01 :	<b>5,000 SPTX</b>
Private Sale 02 :	<b>10,000 SPTX</b>
Private Sale 03 :	<b>20,000 SPTX</b>
Private Sale 04 :	<b>40,000 SPTX</b>
Private Sale 05 :	<b>80,000 SPTX</b>
Private Sale 06 :	<b>160,000 SPTX</b>
Private Sale 07 :	<b>320,000 SPTX</b>
Public Sale :	<b>110,000,000 SPTX</b>
Initial Market Cap :	<b>\$ 12,500 USD</b>
Network Chain :	<b>Binance Smart Chain (BEP 20)</b>
